Abstract of JP8211864

PURPOSE: To provide an automatic playing device with which a user can concentrate to a playing and also he can perform the playing without caring about the recording of automatic playing data at the time of recording the automatic playing data. CONSTITUTION: When the recording of the automatic playing data is started, at first, a start event 51, and, next, a delta time 52 indicating the time between respective events and a panel setting event 53 indicating the present state of panel operating pieces are written in an automatic playing data storage area 7, and then a delta time 54 and the event 55 of the operating piece operated by a user are written and subsequently in the same manner, writings are performed in the order of the delta time and the event of the operating piece and when 10sec. has elapsed, a 10sec. event 56 is written ((a)). The automatic playing data are successively written in this manner, when a set recording time has elapsed, automatic playing data from the start event 51 to the 10sec. event 56 are erased and these data are written before the first delta time 57 of automatic playing data whose start even 51 is not erased ((b)).
